Fuck Yeah, Video Games Daniel Hardcastle 2019-09-19 As Daniel Hardcastle careers towards thirty, he looks back on what has really made him happy in life: the friends, the romances... the video games. Told through encounters with the most remarkable – and the most mind-boggling – games of the last thirty-odd years, Fuck Yeah, Video Games is also a love letter to the greatest hobby in the world. From God of War to Tomb Raider, Pokémon to The Sims, Daniel relives each game with countless in-jokes, obscure references and his signature wit, as well as intricate, original illustrations by Rebecca Maughan. Alongside this march of merriment are chapters dedicated to the hardware behind the games: a veritable history of Sony, Nintendo, Sega and Atari consoles. Lost in a Good Game Pete Etchells 2019-04-04 'Etchells writes eloquently ... A heartfelt defence of a demonised pastime' The Times 'Once in an age, a piece of culture comes along that feels like it was specifically created for you, the beats and words and ideas are there because it is your life the creator is describing. Lost In A Good Game is exactly that. It will touch your heart and mind. And even if Bowser, Chun-li or Q-Bert weren't crucial parts of your youth, this is a flawless victory for everyone' Adam Rutherford When Pete Etchells was 14, his father died from motor neurone disease. In order to cope, he immersed himself in a virtual world - first as an escape, but later to try to understand what had happened. Etchells is now a researcher into the psychological effects of video games, and was co-author on a recent paper explaining why WHO plans to classify 'game addiction' as a danger to public health as based on bad science and (he thinks) are a bad idea. In this, his first book, he journeys through the history and development of video games - from Turing's chess machine to mass multiplayer online games like World of Warcraft- via scientific study, to investigate the highs and lows of playing and get to the bottom of our relationship with games - why we do it, and what they really mean to us. At the same time, Lost in a Good Game is a very unusual memoir of a writer coming to terms with his grief via virtual worlds, as he tries to work out what area of popular culture we should classify games (a relatively new technology) under.

The Vintage Mencken Alistair Cooke 2008-11 This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1902 Excerpt: ...earth. r' = radius of moon, or other body. P = moon's horizontal parallax = earth's angular semidiameter as seen from the moon. f = moon's angular semidiameter. Now = P (in circular measure), r'-r = r (in circular measure);'. r: r': P: P', or (radius of earth): (radius of moon):: (moon's parallax): (moon's semidiameter). Examples. 1. Taking the moon's horizontal parallax as 57', and its angular diameter as 32', find its radius in miles, assuming the earth's radius to be 4000 miles. Here moon's semidiameter = 16'... 4000:: 57': 16';... r = 400 16 = 1123 miles. 2. The sun's horizontal parallax being 8", and his angular diameter 32V find his diameter in miles. ' Am. 872,727 miles. 3. The synodic period of Venus being 584 days, find the angle gained in each minute of time on the earth round the sun as centre. Am. l''-54 per minute. 4. Find the angular velocity with which Venus crosses the sun's disc, assuming the distances of Venus and the earth from the sun are as 7 to 10, as given by Bode's Law. Since (fig. 50) S V: VA:: 7: 3. But Srhas a relative angular velocity round the sun of l''-54 per minute (see Example 3); therefore, the relative angular velocity of A V round A is greater than this in the ratio of 7: 3, which gives an approximate result of 3''-6 per minute, the true rate being about 4'' per minute. Annual Paralax. 95. We have already seen that no displacement of the observer due to a change of position on the earth's surface could apparently affect the direction of a fixed star. However, as the earth in its annual motion describes an orbit of about 92 million miles radius round the sun, the different positions in space from which an observer views the fixed stars from time to time throughout the year must be separated ...

Rules for Reformers Douglas Wilson 2014-12-02 In Rules for Reformers, Douglas Wilson poaches the political craft of radical progressives and applies it to Christian efforts in the current culture war. The result is a spicy blend of combat manual and cultural manifesto. Rules for Reformers is a little bit proclamation of grace, a little bit Art of War, and a little bit analysis of past embarrassments and current cowardice, all mixed together with a bunch of advanced knife-fighting techniques. As motivating as it is provocative, Rules for Reformers is just plain good to read. Thanks to Saul Alinsky's Rules for Radicals: A Practical Primer for Realistic Radicals--a book well-loved by Barack Obama, Hillary Clinton, and many others--for much of the shrewd advice, and for none of the worldview.

Introduction to Radar Using Python and MATLAB Lee Andrew (Andy) Harrison 2019-10-31 This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Ray's Tune Ray Rivera 2008-05-13 "Pay it no mind." From the very beginning, the odds were against Ray Rivera ever surviving the streets, let alone building a successful recording career that has spanned 50-plus years. Hit with

staggering illness, astonishing neglect and crushing homelessness before ever leaving his teens, Ray managed to not only survive, but prosper through his steadfast devotion to music and single-minded adherence to those four simple words: Pay it no mind. This is jazzman Ray Rivera's story of triumph in the face of poverty, racism and the forces of greed. Go back with him to where it all started on the streets of Spanish Harlem where the gutters were lined with yesterday's trash and tomorrow's dreams. Join him in some of the hottest nightclubs in New York City like the world-famous Tropicana where equatorial heat mixed with cool jazz nightly. Meet some of the craziest cats in the last half-century of jazz music like Charlie Parker and Babs Gonzales, and learn how one man with the love of song successfully sidestepped their often self-destructive trajectory. In Ray's Tune Ray Rivera candidly tells a local journalist how he did it all back then, and how he's still doing it today.
