Thinking in New Boxes
Luc De Brabandere 2013-09-10
When BIC, manufacturer of disposable ballpoint pens, wanted to grow, it looked for an idea beyond introducing new sizes and ink colors. Someone suggested lighters. LIGHTERS? With an idea that seemed *crazy* at first, that bright executive, instead of seeing BIC as a pen company—a business in the PEN “box”—figured out that there was growth to be found in the DISPOSABLE “box.” And he was right. Now there are disposable BIC lighters, razors, even phones. The company opened its door to a host of opportunities. IT INVENTED A NEW BOX. Your business can, too. And simply thinking “out of the box” is not the answer. True ingenuity needs structure, hard analysis, and bold brainstorming. It needs to start THINKING IN NEW BOXES—a revolutionary process for sustainable creativity from two strategic innovation experts from The Boston Consulting Group (BCG). To make sense of the world, we all rely on assumptions, on models—on what Luc de Brabandere and Alan Iny call “boxes.” If we are unaware of our boxes, they can blind us to risks and opportunities. This innovative book challenges everything you thought you knew about business creativity by breaking creativity down into five steps:
• Doubt everything. Challenge your current perspectives.
• Probe the possible. Explore options around you.
• Diverge. Generate many new and exciting ideas, even if they seem absurd.
• Converge. Evaluate and select the ideas that will drive breakthrough results.
• Reevaluate. Relentlessly. No idea is a good idea forever. And did we mention Reevaluate? Relentlessly. Creativity is paramount if you are to thrive in a time of accelerating change. Replete with practical and potent creativity tools, and featuring fascinating case studies from BIC to Ford to Trader Joe’s, Thinking in New Boxes will help you and your company overcome missed opportunities and stay ahead of the curve. This book isn’t a simpleminded checklist. This is Thinking in New Boxes. And it will be fun. (We promise.) Praise for Thinking in New Boxes
“Excellent . . . While focusing on business creativity, the principles in this book apply anywhere change is needed and will be of interest to anyone seeking to reinvent herself.”—Blogcritics
“Thinking in New Boxes is a five-step guide that leverages the authors’ deep understanding of human nature to enable readers to overcome their limitations and both imagine and create their own futures. This book is a must-read for people living and working in today’s competitive environment.”—Ray O. Johnson, Ph.D., chief technology officer, Lockheed Martin
“Thinking In New Boxes discusses what I believe to be one of the fundamental shifts all companies/brands need to be thinking about: how to think creatively, in order to innovate and differentiate our brands. We need to thrive and lead in a world of accelerating change and this book challenges us to even greater creativity in our thinking. One of the best business books I’ve read in a long time.”—Jennifer Fox, CEO, Fairmont Hotels & Resorts
“As impressive as teaching new tricks to old dogs, Thinking in New Boxes is both inspirational and practical—a comprehensive, step-by-step guide to sharpening one’s wits in order to harness creativity in the workplace.”—Peter Gelb, general manager, Metropolitan Opera

The Moment of Everything
Shelly King 2014-09-02
In the tradition of The Cookbook Collector comes a funny, romantic novel about a young woman finding her calling while saving a used bookstore. Maggie Duprv®, recently “involuntarily separated from payroll” at a Silicon Valley startup, is whiling away her days in The Dragonfly’s Used Books, a Mountain View institution, waiting for the Next Big Thing to come along. When the opportunity arises for her to network at a Bay Area book club, she jumps at the chance—even if it means having to read Lady Chatterley’s Lover, a book she hasn’t encountered since college, in an evening. But the edition she finds at the bookstore is no Penguin Classics Chatterley—it’s an ancient hardcover with notes in the margins between two besotted lovers of long ago. What Maggie finds in her search for the lovers and their fate, and what she learns about herself in the process, will surprise and move readers. Witty and sharp-eyed in its treatment of tech world excesses, but with real warmth at its core, The Moment of Everything is a wonderful read.

Soil Mechanics Fundamentals
Muni Budhu 2015-04-24
This accessible, clear and concise textbook strikes a balance between theory and practical applications for an introductory course in soil mechanics for undergraduates in civil engineering, construction, mining and geological engineering. Soil Mechanics Fundamentals lays a solid foundation on key principles of soil mechanics for application in later engineering courses as well as in engineering practice. With this textbook, students will learn how to conduct a site investigation, acquire an understanding of the physical and mechanical properties of soils and methods of determining them, and apply the knowledge gained to analyse and design earthworks, simple foundations, retaining walls and slopes. The author discusses and demonstrates contemporary ideas and methods of interpreting the physical and mechanical properties of soils for both fundamental knowledge and for practical applications. The chapter presentation and content is informed by modern theories of how students learn: Learning objectives inform students what knowledge and skills they are expected to gain from the chapter. Definitions of Key Terms are given which students may not have encountered previously, or may have been understood in a different context. Key Point summaries throughout emphasize the most important points in the material just read. Practical Examples give students an opportunity to see how the prior and current principles are integrated to solve ‘real world’ problems.

Differential Forms and Applications
Manfredo P. Do Carmo 2012-12-06
An application of differential forms for the study of some local and global aspects of the differential geometry of surfaces. Differential forms are introduced in a simple way that will make them attractive to “users” of mathematics. A brief and elementary introduction to differentiable manifolds is given so that the main theorem, namely Stokes’ theorem, can be presented in its natural setting. The applications consist in developing the method of moving frames expounded by E. Cartan to study the local differential geometry of immersed surfaces in R3 as well as the intrinsic geometry of surfaces. This is then collated in the last chapter to present Chern’s proof of the Gauss-Bonnet theorem for compact surfaces.

Tom Kundig
Tom Kundig 2015-11-10
In Tom Kundig: Works, the celebrated Seattle-based architect presents nineteen new projects, from Hawaii to New York City. Kundig’s award-winning houses, known for their rugged yet elegant and welcoming style, are showcased in lush photography with drawings and sketches, and appear alongside his commercial work—from multistory complexes to the Tacoma Art Museum to a line of hardware (handles, door pulls, hinges, and more). In firsthand accounts, Kundig describes the projects and his design process with many personal anecdotes, making Tom Kundig: Works as much memoir as monograph. The book also includes an introduction by design editor Pilar Viladas and in-depth conversations with Kundig’s frequent collaborators—“gizmologist” Phil Turner and contractor Jim Dow (Schuchart/ Dow)—and clients (Bigwood Residence and Studhorse).

The Dancing Girls of Lahore
Louise Brown 2009-10-13
An unforgettable and compassionate look at the lives of the residents of Lahore’s pleasure district
The Dancing Girls of Lahore inhabit the Diamond District in the shadow of a great mosque. The 21st century goes on outside the walls, this ancient quarter, but scarcely registers within. Though their trade can be described with accuracy as prostitution, the dancing girls have an illustrious history: beloved by sultans, their sophisticated art encompassed the best of Mughal culture. The modern day Bollywood aesthetic, with its love of gaudy spectacle, music, and dance, is their distant legacy. But the life of the pampered courtesan is not the one now being lived by Maha and her three girls. What they do is forbidden by Islam, though tolerated; but they are, unclean, and Maha’s daughters, like her, are born into the business and will not leave it. Sociologist Louise Brown spent four years in the most intimate study of the family life of one Lahori courtesan. Beautifully understated, it turns a novelist’s eye on a true story that beggars the imagination. Maha, at fourteen a classically trained dancer of exquisite grace, had her virginity sold to the Sultan of Dubai; when her own daughter Nena comes of age and Maha cannot bring in the money she once did, she faces a terrible decision as the agents of the Sultan come calling once more.

Walker Evans 2001
*As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum’s collection, Evans’s photographs are the work of an artist whose temperament was distinctly at odds with Beal’s impassioned rhetoric. Evans’s photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work.”--Jacket.

Fundamentals of Chemical Engineering Thermodynamics
Themis Matsoukas 2013
The Clear, Well-Organized Introduction to Thermodynamics Theory and Calculations for All Chemical Engineering Undergraduate Students
This text is designed to make thermodynamics far easier for undergraduate chemical engineering students to learn, and to help them perform thermodynamic calculations with confidence. Drawing on his award-winning courses at Penn State, Dr. Themis Matsoukas focuses on “why” as well as “how.” He offers extensive imagery to help students conceptualize the equations, illuminating thermodynamics with more than 100 figures, as well as 190 examples from within and beyond chemical engineering. Part I clearly introduces the laws of thermodynamics with applications to pure fluids. Part II extends thermodynamics to mixtures, emphasizing phase and chemical equilibrium. Throughout, Matsoukas focuses on topics that link tightly to other key areas of undergraduate chemical engineering, including separations, reactions, and capstone design. More than 300 end-of-chapter problems range from basic calculations to realistic environmental applications; these can be solved with any leading mathematical software. Coverage includes
• Pure fluids, PVT behavior, and basic calculations of enthalpy and entropy
• Fundamental relationships and the calculation of properties from equations of state
• Thermodynamic analysis of chemical processes
• Phase diagrams of binary and simple ternary systems
• Thermodynamics of mixtures using equations of state
• Ideal and nonideal solutions
• Partial miscibility, solubility of gases and solids, osmotic processes
• Reaction equilibrium with applications to single and multiphase reactions

Sarah Jakes 2014-04-01
Don’t let your past keep you from a full future. Like every girl, Sarah Jakes dreamed of a life full of love, laughter, and happy endings. But her dreams changed dramatically when she became ~~Historian~~ ~~the~~ ~~Woman~~, ~~Reality~~ only compounded by the fact that her father, Bishop T.D. Jakes, was one of the most influential megachurch pastors in the nation. As a teen mom and a high-profile preacher’s kid, her road was lonely. She was shunned at school, gossiped about at church. And a few years later, when a fairy-tale marriage ended in a spiral of hurt and rejection, she could have let her pain dictate her future. Instead, she found herself surrounded by a God she’d given up on, crashing headlong with Him into a destiny she’d never dreamed of. Sarah’s captivating story, unflinchingly honest and deeply vulnerable, is a vivid reminder that God can turn even the deepest pain into His perfection. More than a memoir, Lost and Found offers hope and encouragement. Perhaps you, like Sarah, find yourself wandering the detours of life. Regardless of how lost you feel, you, too, can be found.

I Am Leaper

Rats Saw God
Rob Thomas 2012-06-12
Steve details his descent from bright star to burnout in this newly repackaged edition of the definitive, highly acclaimed novel from the creator of Veronica Mars and Party Down. Houston, sophomore year: Steve is on top of the world. He and his friends are the talk of the school. He’s in love with a terrific girl. He can even deal with “the astronaut”—a world-famous hero who happens to be his father. San Diego, senior year: Steve is bummed out, dragged out, flunking out. A no-nonsense counselor says he can graduate if he writes a 100-page paper. So Steve starts writing, and as the paper becomes more and more personal, he reveals how a National Merit Scholar has become an under-achieving stoner. And in telling how he got to where he is, Steve discovers how to get to where he wants to be.

The Master Undone
Lisa Renee Jones 2013-08-12
I told him goodbye, and I will not call him. I know if I do, it will be my undoing, and I’ll once again be caught up in his spell. I will once again be...lost. In her private journals, Rebecca laid bare her soul, revealing her obsession for the one man whose erotic demands captivated her imagination—and enslaved her forever. Now, with Rebecca no longer in his life, her former Master is lost—questioning everything he thought he knew about himself, and the control he holds in such high regard. One woman will reach out to heal him and then turn away, leaving him haunted. She is nothing he thought he wanted, and somehow everything he needs. He tells himself to forget her, but he cannot escape his desire for her. He has to have more...

The Temples of Lhasa
Andre Alexander 2005
The Temples of Lhasa is a comprehensive survey of historic Buddhist sites in the Tibetan capital of Lhasa. The study is based on the Tibetan Heritage Fund’s official five-year architectural conservation project in Tibet, during which the author and his team had unlimited access to the buildings studied. The documented sites span the entire known history of Tibetan Buddhist art and architecture from the 7th to the 21st centuries The book is divided into thirteen chapters, covering all the major and minor temples in historic Lhasa. These include some of Tibet’s oldest and most revered sites, such as the Lhasa Tsukla-khang and Ramoche, as well as lesser-known but highly important sites such as the Jebumgang Lha-khang, Meru Dratsang and Meru Nyingpa. It is illustrated with numerous color plates taken over a period of roughly 15 years from the mind-1980s to today and is augmented with rare photographs and reproductions of Tibetan paintings. This book also provides detailed architectural drawings and maps made by the project. Each site has been completely surveyed, documented and analyzed. The history of each site has been written - often for the first time - based on source texts and survey results, as well as up-to-date technology such as carbon dating, dendrochronology, and satellite data. Tibetan source texts and oral accounts have also been used to reconstruct the original design of the sites. Matthew Akester has contributed translations of Tibetan source texts, including excerpts from the writings of the Fifth and Thirteenth Dalai Lamas. This documentation of Tibetan Buddhist temple buildings is the most detailed of its kind, and is the first professional study of some of Tibet’s most significant religious buildings. The comparative analysis of Tibetan Buddhist architecture covers 13 centuries of architectural history in Tibet.”-- Publisher’s website.

The Gospel & the Zodiac
Bill Darlison 2008-02-14
“Darlison elucidates the zodiac’s significant place in the Gospels, most specifically in the Book of Mark . . . An intriguing leap into faith” (Kirkus Reviews). For millennia the world has been driven by the differences between the great patriarchal religions. Western civilization—or Christendom, as it was once called—received its values and its confidence from a belief in God, the Father, and Jesus, his only son. But what if this conviction were founded on an error? Who is the man in the factually inconsistent Gospel stories? And who is the man who makes a brief appearance carrying a jar of water? This extraordinary study by a Unitarian minister suggests that Jesus never existed historically; he was simply a representation of an astrological theology—a representation, simply put, of the zodiac sign of Aquarius. In *The Gospel & the Zodiac*, Rev. Bill Darlison demonstrates that all the other signs are present too, in perfect zodiacal order. The Gospel story is not the product of historians or eyewitnesses, but an older, mystical text produced by an ancient, esoteric school as a guide to the Age of Pisces. Every bit as revelatory and controversial as it sounds, *The Gospel & the Zodiac* will shake up the religious status quo, and in doing so, provide both a new look at a religious icon and a deeper understanding of the faith that binds millions together. “Darlison begins by looking at different scholarly approaches to the gospels, then outlines his astrological interpretation logically and lucidly, matching the zodiacal signs to the narrative of Mark.” —Fortean Times

Fashion and Museums
Marie Riegels Melchior 2014-06-19
Why is fashion “in fashion” in museums today? This timely volume brings together expert scholars and curators to examine the reasons behind fashion’s popularity in the twenty-first century museum and the impact this has had on wider museum practice. Chapters explore the role of fashion in the museum across a range of international case studies including the Costume Institute at the Metropolitan Museum of Art in New York, The Fashion Museum at Bath, ModeMuseum in Antwerp and many more. Contributions look at topics such as how fashion has made museums accessible to diverse audiences and how curators present broader themes and issues such as gender, class and technology innovatively through exhibiting fashion. Drawing on approaches from dress history, fashion studies, museum studies and curatorship, this engaging book will be key reading for students and scholars across a range of disciplines.
