Central European Functional Programming School Anna Soós 2008-09-27 This volume presents the revised lecture notes of selected talks given at the second Central European Functional Programming School, CEFP 2007, held June 23–30, 2007 at Babeş-Bolyai University, Cluj-Napoca, Romania. The summer school was organized in the spirit of the advanced programming schools. CEFP focuses on involving an ever-growing number of students, researchers, and teachers from central and eastern European countries. We were glad to welcome the invited lecturers and the participants: 15 professors and 30 students from 9 different universities. The intensive program offered a creative and inspiring environment and a great opportunity to present and exchange ideas in new topics of functional programming. The lectures covered a wide range of topics like interactive work flows for the Web, proving properties of lazy functional programs, lambda calculus and abstract lambda calculus machines, programming in λ mega, object-oriented functional programming, and refactoring in Erlang. We are very grateful to the lecturers and researchers for the time and the effort they devoted to the talks and the revised lecture notes. The lecture notes were each carefully checked by reviewers selected from experts of functional programming. Afterwards the papers were revised once more by the lecturers. This revision process guaranteed that only high-quality papers are accepted in the volume of the lecture notes.
