The Mesolithic Hunters of the Trentino Royston Clark 2000 The Mesolithic of this region of Northern Italy is known through faunal remains and lithic material found within rockshelters and at open-air hunting camps and processing sites. This report provides a synthesis of the material and uses risk-based models to assess long-term spatial and temporal changes from the Late Mesolithic to the Early Neolithic. These models assess the efficiency of tools for hunting and processing food, and the dietary and nutritional requirements implicit in subsistence changes.

The Italian Renaissance State Andrea Gamberini 2012-03-29 This magisterial study proposes a revised and innovative view of the political history of Renaissance Italy. Drawing on comparative examples from across the peninsula and the kingdoms of Sicily, Sardinia and Corsica, an international team of leading scholars highlights the complexity and variety of the Italian world from the fourteenth to early sixteenth centuries, surveying the mosaic of kingdoms, principalities, signorie and republics against a backdrop of wider political themes common to all types of state in the period. The authors address the contentious problem of the apparent weakness of the Italian Renaissance political system. By repositioning the Renaissance as a political, rather than simply an artistic and cultural phenomenon, they identify the period as a pivotal moment in the history of the state, in which political languages, practices and tools, together with political and governmental institutions, became vital to the evolution of a modern European political identity.

The Politics of Wounds Ana Carden-Coyne 2014 The Politics of Wounds explores military patients' experiences of frontline medical evacuation, war surgery, and the social world of military hospitals during the First World War. The proximity of the front and the colossal numbers of wounded created greater public awareness of the impact of the war than had been seen in previous conflicts, with serious political consequences. Frequently referred to as 'our wounded', the central place of the soldier in society, as a symbol of the war's shifting meaning, drew contradictory responses of compassion, heroism, and censure. Wounds also stirred romantic and sexual responses. This volume reveals the paradoxical situation of the increasing political demand levied on citizen soldiers concurrent with the rise in medical humanitarianism and war-related charitable voluntarism. The physical gestures and poignant sounds of the suffering men reached across the classes, giving rise to convictions about patient rights, which at times conflicted with the military's pragmatism. Why, then, did patients represent military medicine, doctors and nurses in a negative light? The Politics of Wounds listens to the voices of wounded soldiers, placing their personal experience of pain within the social, cultural, and political contexts of military medical institutions. The author reveals how the wounded and disabled found culturally creative ways to express their pain, negotiate power relations, manage systemic tensions, and enact forms of 'soft resistance' against the societal and military expectations of masculinity when confronted by men in pain. The volume concludes by considering the way the state ascribed social and economic values on the body parts of disabled soldiers through the pension system.

Real Cities Virtual Cities Edoardo Chiesa 2012-04-10 The book " REAL CITIES- VIRTUAL CITIES - How to build the real world environmentally and financially sustainable based on the New Telematic City - NTC" shows how, using tools currently known and popular, you can set that world ecologically and financially sustainable, which many hope. Expression of this new mode is the NTC - New Telematic City, not just an acronym, but a business, technological, social opportunity to detail and to achieve. The book first discusses the so-called "pillars" upon which the NTC is based: 1. 1. The first one is the ICT, namely information and communication technologies. 2. 2. The second one is the set of rules and regulations of the European Union, to ensure security and development within Europe. 3. 3. The third one consists of the oriental arts like yoga and martial arts, secular heritage of the East, capable of ensuring the personal development of each individual. It is then shown how, using the pillars with the help of innovative concepts never before

assumed, it is possible to redesign the organization of society in the manner proposed by the author.

The Story of Tönle Mario Rigoni Stern 1998 Mario Rigoni Stern was born in 1921 in Asiago, in the mountains of northeastern Italy. Throughout his literary career, he has remained deeply attached to the region of his birth, its peasant customs, its dialect, its seasonal cycles and shifting historical fortunes. Tonle Bintarn's story takes place in the mountains of the Veneto region, which once bordered the Austro-Hungarian Empire and where smuggling was a means of subsistence for the peasant population. Having run afoul of a patrol of revenue agents, Tonle must seek refuge beyond the frontier in Central Europe, where year after year he lives by doing odd jobs and working, among other things, as an itinerant print peddler, a horse trainer in Hungary, and a gardener in a Prague castle. But every winter he returns secretly to his home and family, until finally a pardon is granted. By now his children are grown and he has little to do but tend his sheep. Meanwhile, the times are changing, social values are disintegrating under the impact of modernization, and Europe moves ever closer to disaster. During the devastation of the First World War, the occupation and ultimate destruction of his village, and his own internment in an Austrian camp, it is Tonle's loyalty to his roots and his stubborn devotion to his task as a shepherd that persist and make him a quiet symbol of heroism and human endurance.

Epic Bike Rides of the World Lonely Planet 2016-08-01 Lonely Planet: The world's leading travel guide publisher Discover 200 of the best places to ride a bike in this beautifully illustrated hardback. From family-friendly, sightseeing urban rides to epic adventures off the beaten track. Destinations range from France and Italy, for the world's great bike races, to the wilds of Mongolia and Patagonia. These journeys will inspire - whether you are an experienced cyclist or just getting started. The book is organised by continent. In the Americas we join a family bikepacking trip in Ecuador; we pedal the Natchez Trace Parkway and stop at legendary music spots; we ride the Pacific Coast Highway in Oregon and California; go mountain biking in Moab and Canada; and explore the cities of Buenos Aires and New York by bicycle. European rides include easy-going trips around Lake Constance, along the Danube and the Loire, and coast-to-coast routes; routes in Tuscany, Spain and Corsica; and professional journeys up Mt Ventoux and around the Tour of Flanders. In Asia, we venture through Vietnam's valleys; complete the Mae Hong Son circuit in northern Thailand; cross the Indian Himalayas; and pedal through Bhutan. And in Australia and New Zealand we take in Tasmania and Queensland by mountain bike; cycle into Victoria's high country and around Adelaide on road bikes; and try some of New Zealand's celebrated cycle trails. Each ride is illustrated with stunning photography and a map. A toolkit of practical details - where to start and finish, how to get there, where to stay and more - helps riders plan their own trips. There are also suggestions for three more similar rides around the world for each story. Each piece shows how cycling is a fantastic way to get to know a place, a people and their culture. Terra Forma Frederique Ait-Touati 2022-02-01 Charting the exploration of an unknown world—our own—with a new cartography of living things rather than space available for conquest or colonization. This book charts the exploration of an unknown world: our own. Just as Renaissance travelers set out to map the terra incognita of the New World, the mapmakers of Terra Forma have set out to rediscover the world that we think we know. They do this with a new kind of cartography that maps living things rather than space emptied of life and available to be conquered or colonized. The maps in Terra Forma lead us inward, not off into the distance, moving from the horizon line of conventional cartography to the thickness of the ground, from the global to the local. Each map in Terra Forma is based on a specific territory or territories, and each tool, or model, creates a new focal point through which the territory is redrawn. The maps are “living maps,” always under construction, spaces where stories and situations unfold. They may map the Earth’s underside rather than its surface, suggest turning the layers of the Earth inside out, link the biological physiology of living inhabitants and the physiology of the land, or trace a journey oriented not by the Euclidean space of GPS but by points of life. These speculative visualizations can constitute the foundation for a new kind of atlas.

Lost and Found Sarah Jakes 2014-04-01 Don't let your past keep you from a full future. Like every girl, Sarah Jakes dreamed of a life full of love, laughter, and happy endings. But her dreams changed dramatically when she became pregnant at age thirteen, a reality only compounded by the fact that her father, Bishop T.D. Jakes, was one of the most influential megachurch pastors in the nation. As a teen mom and a high-profile preacher's kid, her road was lonely. She was shunned at school, gossiped about at church. And a few years later, when a fairy-tale marriage ended in a spiral of hurt and rejection, she could have let her pain dictate her future. Instead, she found herself surrounded by a God she'd given up on, crashing headlong with Him into a destiny she'd never dreamed of. Sarah's captivating story, unflinchingly honest and deeply vulnerable, is a vivid reminder that God can turn even the deepest pain into His perfection. More than a memoir, *Lost and Found* offers hope and encouragement. Perhaps you, like Sarah, find yourself wandering the detours of life. Regardless of how lost you feel, you, too, can be found.

Ballooning Over Everest Leo Dickinson 1993 This is a photographic record of Leo Dickinson and his intrepid team of Australian and British pioneers who spent years preparing to gaze down on the summit of the highest mountain in the world. For the sake of a stupendous flight lasting less than an hour, this unlikely collection of rugged individuals fought, co-operated, quarrelled, laughed and occasionally cried. As well as this entertaining account of an historic first, they brought back an entirely new view of an awesome Himalayan peak.

Professors as Writers Robert Boice 1990-01-01 Here is a proven book to help scholars master writing as a productive, enjoyable, and successful experience -- Author, Robert Boice, prepared this self-help manual for professors who want to write more productively, painlessly, and successfully. It reflects the author's two decades of experiences and research with professors as writers -- by compressing a lot of experience into a brief, programmatic framework. Like the actual sessions and workshops in which the author works with writers, this book admonishes and reassures. In the innovative book lies the path for sustained, highly productive scholarly writing!

Training and Racing with a Power Meter, 2nd Ed. Hunter Allen and Andy Coggan, PhD have completely revised the book that made power meters understandable for amateur and professional cyclists and triathletes. Power meters have become essential tools for competitive cyclists and triathletes. No training tool can unlock as much speed and endurance as a power meter--for those who understand how to interpret their data. A power meter displays and records exactly how much energy a cyclist expends, which lends unprecedented insight into that rider's abilities and fitness. With the proper baseline data, a cyclist can use a power meter to determine race strategy, pacing, and tactics. Training and Racing with a Power Meter makes it possible to exploit the incredible usefulness of the power meter by explaining how to profile strengths and weaknesses, measure fitness and fatigue, optimize workouts, time race readiness, and race using power. This new edition: Enables athletes to predict future performance and time peak form Introduces fatigue profiling, a new testing method to pinpoint weaknesses Includes two training plans to raise functional threshold power and time peaks for race day Offers 75 power-based workouts tuned for specific training goals This updated edition also includes new case studies, a full chapter on triathlon training and racing, and improved 2-color charts and tables throughout. Training and Racing with a Power Meter, will continue to be the definitive guide to the most important training tool ever developed for endurance sports.
