Tree Appraisal and the Value of Trees - Purdue University

DBH is measured using a special diameter-measuring tape wrapped around the tree at 4.5 feet above the ground. In lieu of the special measuring tape, regular

measuring tape can be used to determine circumference and that number divided by 3.14 to calculate DBH. Once the diameter is determined, divide by 2 to get the radius.

Exchange Rate Risk Measurement and Management: Issues ...

Measuring currency risk may prove difficult, at least with regards to translation and economic risk (Van Deventer, Imai, and Mesler, 2004; Holton, 2003). At present, a widely-used method is the value-at-risk (VaR) model. Broadly, value at risk is defined as the maximum loss for a given exposure over a given time horizon with $z\%$ confidence.

Why organisations need to up their game on understanding, ...

the flow of value-

creation in their organisation, and how that flow of value-creation will be sustained into the future through the people investments being made today. And, all of this starts with an understanding of how the conception of value has changed and is changing. The way in which we judge the value created by organisations has changed.

Guide to Financial Markets - The Economist

Asset valuation. Market

prices offer the best way to determine the value of a firm or of the firm's assets, or property. This is important not only to those buying and selling businesses, but also to regulators. An insurer, for example, may appear strong if it values the securities it owns at the prices it paid for them years
